Summary

MSc Computer Science student at Manchester Metropolitan University (First-Class Economics, 2024) seeking a 12-month industrial placement from September 2026. Experienced building and deploying full-stack applications in Java and React, including cloud-hosted projects on AWS. My economics background gives me a strong analytical foundation and I'm looking for a placement where I can apply and grow my skills in a real-world environment.

Technical Skills

Languages: Java, Python, JavaScript, SQL, C#

Frontend: React, HTML, CSS

Backend: REST APIs, MVC Architecture

Databases: MySQL, Oracle SQL

Cloud & Tools: AWS (Elastic Beanstalk, RDS), Git, Linux

Projects

Film Database Full Stack Application (2026)

Java, React, JavaScript, REST APIs, MVC, MySQL, AWS | [GitHub](#)

- Developed a full-stack film database application with CRUD functionality using Java, React and RESTful API architecture
- Implemented dynamic film search, data retrieval and frontend state management using Fetch API
- Applied MVC principles to separate frontend, backend and data handling logic
- Deployed the application using AWS Elastic Beanstalk with a MySQL database hosted on AWS RDS

Retro Desktop Portfolio (2025)

React, JavaScript, Vite, CSS | [GitHub](#) | [Live Demo](#)

- Developed an interactive Windows 95-inspired portfolio interface using React and Vite
- Implemented dynamic UI components including a functional clock, calendar and animated start menu with custom retro desktop styling
- Designed responsive desktop-style UI components and deployed using Netlify and GitHub

PC Component Inventory Management System (2025)

Java, Object-Oriented Programming | [GitHub](#)

- Designed and implemented a remote stock control system for PC components using Java and object-oriented programming principles
- Developed modular classes and inventory management functionality to support stock tracking and manipulation
- Applied encapsulation, inheritance and abstraction to structure application logic

GPS Waypoint Management System (2026)

C#, Arrays, Linked Lists, Algorithms | [GitHub](#)

- Developed a waypoint and route management system in C# using arrays and linked lists to store and manipulate GPS data
- Implemented insertion, deletion and traversal operations for dynamically managed route structures
- Applied data structures and algorithmic principles to optimise waypoint handling functionality

Education

MSc Computer Science

Manchester Metropolitan University | Sept 2025 – *Present*

- Advanced Object-Oriented Programming (87%)
- Information Systems & Databases (70%)
- Algorithms & Data Structures
- Cloud & Enterprise Development

BSc Economics (First-Class Honours)

Manchester Metropolitan University | Sept 2021 – July 2024

- Conducted large-scale econometric and statistical analysis using STATA and R, including regression modelling, time-series analysis and data visualisation
- Completed a final-year research project analysing relationships between human development, democracy and international football performance across 149 countries (76%)

Experience

Security Officer (Part-Time)

The Bridgewater Hall | Manchester | 2021 – *Present*

- Delivered front-of-house and event security within a high-profile live entertainment venue, maintaining safety standards and positive public engagement
- Undertook team lead responsibilities during selected events, assisting with coordination and risk assessment
- Supported high-profile events including royal visits, maintaining professionalism and vigilance under pressure

Security Officer (Part-Time)

Showsec | Manchester | 2021 – 2022

- Provided event security within busy live entertainment and theatre environments, supporting venue safety and customer experience
- Worked as part of security teams during public events, assisting with crowd management and operational procedures
- Maintained professionalism and strong communication skills while working in fast-paced public-facing environments

Coach

Sports Stars | Takeley, Essex | Summer 2019

- Assisted in delivering sports sessions and activities for children within a team-focused environment
- Developed communication, leadership and organisational skills while supervising groups and supporting participant engagement
- Maintained a positive, safe and supportive environment during coaching sessions and activities
